

## How to Download health information on the MediTech MHealth Patient Portal:

Step  
1

Step  
2

Step  
3

There is a medical record file available to download on your device. The file will be available for a limited time.

If there is information added to the patient's medical record after the last requested date and time below, you can request for a new medical record file. However, the current file will be deleted and the new request will begin to process. An email notification will be sent once the file becomes available to download.

Last requested date & time: Fri, Mar 28, 2025 at 11:28 am  
Last requested by:

We are retrieving the medical record file. This may take time. Do not exit the page.  
The file will be available for download once the download button appears on the screen.
